The skin is provided with millions of little pores and glands invisible to the natural eye, yet through these tiny outlets the larger part of the deadly matter that daily collects in the body is carried off. But nature never intended that poisons of an irritating or acid

character should be eliminated through the skin, the Liver and Kidneys being their natural outlets, and it is when these important organs fail to perform their functions that these acid class ever falled to collect daty from poisons are absorbed into the blood and find their way to the surface of the body through the pores and glands of the skin, producing intense itching and burning, inflammation and swelling, and eruptions of every conceivable size, shape and character.

Skin Diseases differ greatly in their general characteristics and degrees of intensity.

Red and angry looking spots break out upon some part of the body with a mass of small pustules or blisters, from which is discharged a clear or straw colored fluid, which dries and predicting its future.

Douglas, besides numerous elegant The skin often hardens and dries, cracks and bleeds from the effects of the fiery acids, buildings erected by the company and others, is a vertiable forest of rafters and unfinished buildings below the company and unfinished buildings erected by the company and others, is a vertiable forest of rafters and unfinished buildings erected by the company and others.

throwing off. Pimples, blackheads and blotches are evidences of a too acid blood, which has inflamed and clogged the pores.

Skin Diseases being dependent upon the same causes require the same treatment, which must be constitutional and not external. Nothing applied locally to the inflamed surface can bring much relief. The disfiguring eruptions will continue to annoy and pain

you in spite of soaps, washes or powders. There is no hope of getting rid of a skin disease except through the purification of the depreciated blood and neutralizing and filtering out of the circulation all poisonous substances and acids.

The purifying and tonic properties of S. S. S. soon manifest their influence in skin affections; the debilitated system is invigorated and toned up, and the gradual disappearance of the eruptions show that the polluted blood is being brought back to its natural purity and strength. Old chronic skin disorders, which have resisted all the ordinary methods of

SALT RHEUM, ECZEMA. TETTER, NETTLE RASH, PSORIASIS, ACNE. BOILS.

treatment, readily yield to the curative powers of S. S., and there is no reason line and a sort of custom house is supwhy the long time sufferer should feel resigned to his fate under the mistaken idea that some skin diseases are incurable, for S. S. S. has cured and is still curing cases perhaps far more desperate than yours. S. S. S. is a purely vegetable derion tourist's delight, the gambler's remedy, containing no Potash, Arsenic

Mines and Minerals of Arizona

A PROSPEROUS TRIO

The Great Industrial Awakening in Southern Arizona.

(Special correspondence of The Republican.r.

The (ide of prosperity which came lown the San Simon and Suiphur Springs valleys a year ago has finally roken over their banks and flooded the surrounding country for hundreds of miles, where a few short months ago the rerocious jack rabbit turned upon his pursuer and the deadly cetton tail lurked in the greasewood. Everything from an A tent to a four-story brick covers the earth with eternal shade. With the advect of the railroad every species of enterprise has filled the country and broken over the national boundary into Mexico. The San Pedro iver is the only thing the Mexican offifor crossing the line. Naco and Douglas, which might appropriately be cins to think it is bigger than its "pap" and if they keep on driving nails there at the present rate there is no

ciny's depct, with our esteemed friend, C. A. Brow, in charge, is perhaps the In 1883 I brake out with Eczema on my head, legs and arms. The finest in the territory. An auditorium Declars treated me for about two years without giving relief. I next of which any city in the territory could afford to feel proud, has been cometed by Mr. Douglas and presented o the town because they named the saby after him. A company wareouse about 50x130 feet is already full f goods to the roof, while the foundaion for the largest store in Arizona is unpleted. Other splendid improvepents too numerous to mention have been made, including the setting out of fine back which has also been given s the company to the town. The exat and variety of improvements made and around Douglas forbid the ide: that this fine municipal enterprise uld be anything but successful. The wn enjoys an tnexhaustible supply of od water and there is no reason why cannot become another El Paso. The principal disadvantage under which boughts labors is the unreasonable figure at which real estate is held, but this difficulty will naturally adjust itelf in the near future. Douglas is about haif a mile from the Mexican nesed to exist on either side. Douglas is destined to be a city, but is a better place just now/ for carpenters and builders than for business and profes.

A large force of room is not stonal men

Nace is a hot little number on the national line where the railroad crosses paradise and an all-round interesting place to visit. A place where the butchers—on the Mexican side—do their

spective points on this triangle of pros-perity grand old Bisbee is marching tight along. There is no other camp in the territory where with the territory where we will be the territory where the territory where we will be the territory where th Of the three towns ferming the repitals and gymnasiums and every varicty of pleasant, instructive and healthful recreation has been placed hee will never forsake the lead. The city will soon enjoy an adequate water supply through the company's pipe line from the vicinity of Naco, when the last requisite will have been supplied for making it a model town. The El Paso and Southwestern is

re-eminently a white man's system was a fortunate inspiration indeed which moved the Copper Queen people to convert their copper into steel and open up the New Arizona from Hisbee South. The liberality shown by these people to patrons, their wonderful pubspirit and above all their treatment d employes, has Justly endeared them to the general public, standing as it es in vivid contrast to some other tems in the territory. They have best accommodations, the smoothst track and make the best time of ny road in the territory, without w should mention the S. F. P. & P on an qual footing. Everything considered southeastern section of Arizona, which has hereiofore been classed as an irrechainable desert, has stepped promptly to the front as one of the most promising belts within our lines, and with the completion of the smelters, round houses and machine shops nt Douglas, it will have formed a little industrial center of its own

Bartles are developing a prospect with will be round and are no further from the parties are developing a prospect with bee round and are no further from good showing. The voin is over four Douglas than from Bowle. feet wide and ore assays on surface 80

surface for over 2,000 feet.
William LaCase is working close by and is down over 100 feet in an incline shaft. Ore on the surface assayed \$55 Rosslyn, Los Angeles. Arizonians going to Los Angeles in gold, with 10 per cent copper, should stop at the Hotel Roselyn. vein is about three and one-half feet wide, but only a small per cent good ore has been taken out up to the pres-ent time. Mr. LaCase says he will stay

that wealth is there and has confidence in his ability to find it.

Northeast of the Hindson group and joining the same, Prince Von Sachen and others are busy developing a group of mines. The ore looks good and in-Northeast of the Hudson group and dications show some large veins here. Gold and copper shows very plainly throughout the entire vein as far as it has been exposed to view. The Windfall mine, which is owned by the above named parties, is also a very promis-ing mine, having several hundred tons if ore on the dump which shows free gold and about 10 per cent copper.

A claim was leased today by a party from Green creek, name not known, who will commence work about the 16th of June. This claim is north of the Hudson group and adjoining the Gold Dust mine of said group.

Sam Norton, J. Morton and A. Wilkins are all working steadily here near the school house and crossing of Lynx | creek. Their properties are looking well, each and every one showing fro gold ores; also considerable develop-ment work in placer mining has been going on for some time. By these par ties the work is being pushed forward as rapidly as possible with good results. Some of these partles intend to go to california in a short time, but are do-

ing all they can before leaving.
Mr. Clark of Prescott, who bought out W. A. Long in Black Sand wash, is pushing the development work as rapidly as possible in his several mines. The indications are flattering in every way as the properties all show

F. Devine has taken out ore in the past few days that is wonderful. Some specimens show free gold that will run into the thousands to the ton. An sounce of pulp horned over 50 cents in gold. This part of the district shows more free gold ores than any other part I have seen and rich copper is also in mearly all the best ores.
